

Thermodyne's 200NDNL counter-top holding unit provides food quality and kitchen efficiency like no other piece of equipment on the market today. Using patented Fluid Shelf<sup>®</sup> technology each shelf in the cabinet maintains an exact temperature, allowing for extended holding times, without sacrificing appearance or taste. This compact unit requires no door and operates on a simple 120V connection. Units are available as pass through or with a solid panel back.

Unit shown with optional pans and lids
