

Great Equipment Brings Great Results. 200NDNL

Thermodyne's 200NDNL counter-top slow cook and hold oven provides food quality and kitchen efficiency like no other piece of equipment on the market today. Using patented Fluid Shelf® technology each shelf in the cabinet maintains an exact temperature, allowing for extended holding times, without sacrificing appearance or taste. This compact, slow cook and hold oven requires no door and operates on a simple 120V connection. Units are available as pass through or with a solid panel back.
